

LED Vanity Light

PRODUCT DESCRIPTION

J&H LED vanity lights bring adjustable light to bathroom vanities. Both silver fixtures pair aluminum housings with polycarbonate lenses. The 24-inch model uses 25W and delivers 2,250 lumens; the 36-inch model uses 30W and delivers 2,700 lumens, helping match output and fixture size to the vanity. Five selectable color temperatures—2700 kelvins, 3000 kelvins, 3500 kelvins, 4000 kelvins or 5000 kelvins—let you choose a preferred light tone, while Triac dimming adjusts brightness. Both are ETL listed and carry a five-year warranty.

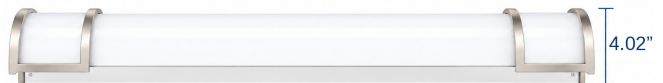

Dimensions

25W

30W
